

Template Hierarchy

Loading correct templates from child or parent theme

1. Check activated theme

twentyseventeen

twentyseventeen-child

2. Check style sheet

```
/*  
Theme Name: Twenty Seventeen Child Theme  
Description: A child theme of the Twenty  
Seventeen default WordPress theme  
Template: twentyseventeen  
Version: 1.0.0  
*/
```

3. Check if parent theme is present

twentyseventeen

twentyseventeen-child

4. Check what files are present in the child theme, which need to be taken from the parent theme and which need to be overwritten

A.

twentyseventeen

twentyseventeen-child
